REASONS FOR ALLOWANCE

1. The following is an Examiner's statement of reasons for allowance: Claims 1-20 are considered allowable since when reading the claims in light of the specification, as per In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385, 388 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including using a trunk label (that is different from the MPLS label) which identifies a class of service for the LSP trunks, and using MPLS labels for carrying multiple VPN paths using said LSP trunks, as specified in claims 1 and 11. A typical MPLS label stack/shim header can have a 20 bit MPLS label and have three bits for class of service (EXP/experimental bits). The examiner have given patentable weight to the claimed "trunk label" as not being merely one or more MPLS labels stacked on top of each other. Also, the term "trunk" is considered to be a term of art referring to the physical link between two switches.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
